### **Leaflet on processing personal data in the society Glasperlenspektrum e.V.**

The Glasperlenspektrum e.V. society processes personal data of its members. This leaflet provides information about data collected, its use and the rights of each member with regard to the collection and use of his or her data. The following text corresponds to the content of section § 14 of the current statutes of the society.

#### **Storage of data**

When a member joins, the society records his address, age and, on a voluntary basis, his bank details. This information is stored in the computer systems of an association management program. The incumbent board members and the treasurer have access.

Each society member is assigned a membership number. The personal data is protected from the knowledge of third parties by appropriate technical and organisational measures. Other information and information about members will only be processed internally by the society if it is useful for promoting the purpose of the society (e.g. storage of the telephone and fax numbers of individual members) and there are no indications that the data subject has an interest worthy of protection that opposes the processing.

#### **Press**

The society informs the daily press as well as the magazine (specify the magazine if necessary) about the information on the society's website ([www.glasperlenspektrum.de](http://www.glasperlenspektrum.de)) and social media (Facebook page of the association: <https://www.facebook.com/Glasperlenspektrum>; Instagram: @glasperlenspektrum). The individual member can object to such publication at any time to the board. In the event of an objection, no further publications will be made regarding the objecting member. Personal data will be removed from the homepage of the association.

#### **Disclosure of member data to association members**

The board of directors announces special events in the life of the society, especially the biennial GlasFestival and the competition, as well as its results on the society's website, on the Facebook and Instagram pages and in the newsletter. Personal data may be published in the process.

The individual member can object to such publication at any time to the society. In the event of an objection, no further publication shall be made regarding the objecting member.

Member directories are only handed out to board members and other members who perform a special function in the society that requires knowledge of the member data. If a member asserts that he or she needs the list of members to exercise his or her statutory rights, the Board of Directors will only hand over the list against a written assurance that the data will not be used for other purposes.

#### **Resignation from the association**

Upon resignation, the member's name, address and year of birth will be deleted from the list of members. Personal data of the retiring member concerning the cash administration will be retained in accordance with the provisions of tax law for up to ten years from the written confirmation of the resignation by the Board of Directors.
